# The Innovation MetaSoft® Studio

# Premiere MetaSoft® Studio

The heart of all CORTEX-systems is the software MetaSoft®. With MetaSoft® Studio we set a new level in flexibility, operation and user friendliness. Two main competences of CORTEX remain: MetaSoft® Studio covers all needs of Cardiopulmonary Exercise Testing as well as the concept of flexible software architecture. Therefore also future insights from science and medicine can be integrated at all times.

## Custom-made Cardiopulmonary Exercise Testing

MetaSoft® Studio is uncompromisingly orientated at the wishes and needs of our customers. Every step you take is managed in intuitive Workflows. Each user can easily adjust these Workflows to his particular demands. User relevant data and operating elements only are shown.

## Faster to the result

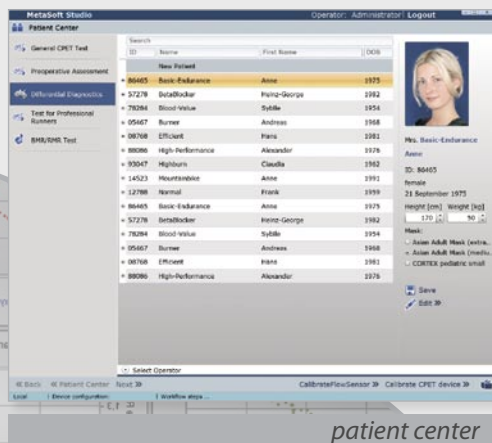

You create results in just 3 short steps. This means remarkably easier handling and more focus on the needs of your subject.

## One software for all examinations

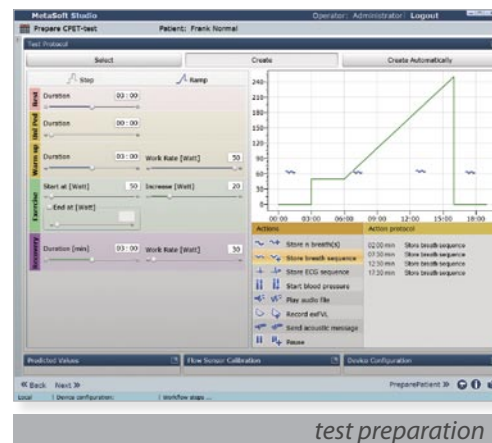

Besides Cardiopulmonary Exercise Testing MetaSoft® Studio can operate additional applications such as stress ECG, blood pressure, lactate measurement and body plethysmography. The user has a permanent overview of all relevant parameters.

## Operation via touchscreen

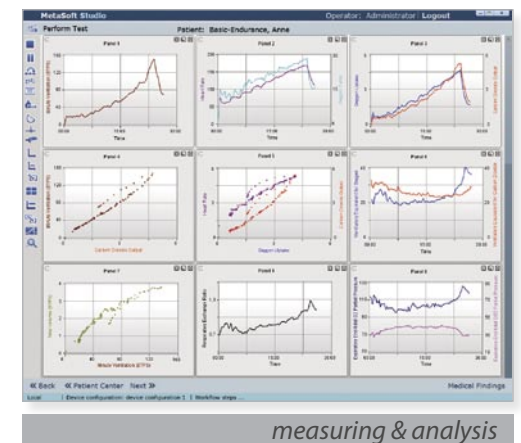

As from now on MetaSoft® Studio can be operated by touchscreen. Besides conventional terminals, touchscreens or all-in-one-PCs can be used.
