

Our contribution to development in medical technology

Progress as a challenge:

- Ever more compact medical equipment where performance and functionality achieves totally new dimensions
- Commercial and ecological aspects of hospital and practice management
- And the highest specifications for safety and hygiene demand new developments in the area of mobile equipment carts

Our contribution – **pro-cort** A new generation of mobile equipment carts for medical technology

pro-cart impressive in every detail

Optimum integration of isolating transfo mer in the basic frame

Smart cable management

One handle - twin benefit

Advanced, ergonomic design

Durable finishes that are easy to clean

Perfect functionality

- Aluminium design high load rating despite low weight
- The shape of the base guarantees high level of stability and optimum integration of an isolating transformer

Smart cable management

- No unnecessary routing direct cabling from unit to socket strip
- Rubber lip permits cable entry and exit over the entire height of the support column
- Fold-out cover extrusion delivers easy access for service and/or assembly operations. Latch mechanism also provides protective function as plug removal barrier

Consistent ergonomics

- Handle with two positions:
 - ↑ Push position at 90° angle ensures adequate freedom of movement for legs
 - ↑ Park position at 15° angle for low space requirement if the equipment cart is parked
- Drawer with one-hand locking

Attractive design

- The optimum synthesis of function and design foregrounds your equipment.
- The colour scheme can be matched to the customer's corporate image at any time.

Maximum safety

- High level of stability at full load and in any position
- Large diameter castors assist support systems in rolling effortlessly over obstacles
- Minimized danger of injury with rounded corners

pro-cart impresses with its unique support column

The interplay of all the product features of **pro-cart** combine to provide perfect functionality. Each individual feature constitutes an important factor. But together they provide a superb link - perfect functionality for your application.

The spacious support column is the outstanding innovation in the singlecolumn **pro-cart** equipment cart. It is divided into 5 function segments:

Central, spacious centre shaft to accommodate socket strips of different dimensions (e.g. US Hospital Grade), also offers space for outgoing cables and residual cable volumes

² The fold-out cover extrusion with rubber lips permits cable entry and exit at any point along the support column. The semicircular cover facilitates access to power supply (e.g. socket strips). The latch option means that the cover extrusion also acts as a plug removal barrier.

- ³ Separate accommodation for accessories, e.g. infusion stands or endoscope holders.
- ⁴ Spacious cable shaft for managed routing of data lines.
- ⁵ Two T-slots with tapped strips (32 mm increments) on the front and rear side of the extrusion for mounting system components, e.g. shelves.
- ⁶ Cover strips close off unused extrusion areas.

Cross-section of pro-cart support column - open

Rubber lip permits cable entry and exit at any point along the support column

pro-cart support column with fittings

Integrated, hygienic covered, central on/off switch in the cap and latch mechanism on the cover extru-sion

- 7
- 8
- 9
- 10 Plug with outgoing cable

Decorative elements and dimensions

- ¹ Cap, optionally with transparent cover for operating the central on/off switch, made of ABS, RAL 7043 traffic grey B
- 2 Cover strips made of EPDM, RAL 7043 Traffic Grey B
- ³ On/off switch with switch cover
- Sliding handle, sheet steel/aluminium
- ⁵ Cover extrusion made of extruded aluminium, RAL 7035 Light Grey powder-coated
- ⁶ Vertical extrusion made of extruded aluminium, RAL 7035 Light Grey powder-coated
- Tapped strip for mounting all system modules,
 M6 tapped holes in increments of 32 mm
- ⁸ Cover strip made of plastic for closing the cavity of the support column between the system modules, RAL 7035 Light Grey
- ⁹ Socket strip for assembly in the vertical extrusion
- ¹⁰ Base made of cast aluminium, RAL 7035 Light Grey powder-coated
- Twin swivel castors Ø 100 mm, two with wheel lock, optionally in conductive version Ø 100 mm or Ø 125 mm
- 12 Isolating transformer 660 VA or 1200 VA with electronic inrush current limitation
- Base trim made of ABS, RAL 7043Traffic Grey B

The basic frame comprises:

- 1 base
- 4 twin swivel castors Ø 100 mm, two with wheel locks
- 1 vertical support column, with 2 tapped strips and swivel cover extrusion with latch, cover strips
- 1 cap

Installation height	Length of column = H	TH for Castors Ø 100 mm	TH for Castors Ø 125 mm

	Delivery fully assembled

The modular system for individual solutions

pro-cart

Use the modular system to put together your individual **pro-cart**. Contact us for any support you require.

Your **pro-cart** will be delivered to you fully assembled and packed within the space of a few days.

Here is a small selection of system components and accessories. You will find a comprehensive description and ordering information on all components suitable for pro-cart in the accessories section from Page 14. An overview of other compatible accessories is provided on page 24.

pro-cart colour scheme to match the corporate identity of our customers

Continuous modular setup in 32 / 64 mm increments for all product lines

pro-cort is also compatible with our range of accessories and system component range

Compact support system fitting with low installation height for the individual system components

pro-cart

Shelves

The shelves in the pro-cart product line have the following features:

- A continuous raised edge offers your valuable equipment a secure platform and allows accessories to be accommodated (using clamps, see Page 24).
- Rounded edges protect users from injury.
- The low installation height of only 32 mm (1 U) saves installation space and permits compact accommodation of equipment.
- The powder-coated impact and scratch-resistant finish is easy to clean and resistant to cleaning agents and disinfectants.
- Fast wipe-clear with smooth finish
- The mousepad can be pulled out on right / left

pro-cart pro-cart shelves are supplied in the following versions:

- ¹ Shelf
- 2 Shelf with handle
- Shelf with mousepad
- 4 Shelf with handle and mousepad

Assembly:	In the front T-slots of the support column
Platform area:	450 mm x 360 mm (W x D)
Load capacity:	20 kg / 44 lbs
Finish:	RAL 7035 Light Grey, handle see decorative colour 2)
Scope of delivery:	1 shelf, preassembled, supplied with mounting hardware

Universal shelf

On request, this shelf is matched the contour of the equipment to be accommodated in conformity with customer specifications.

Load capacity: Material:	10 kg / 22 lbs Universal shelf aluminium Bracket steel
Finish: Scope of delivery:	RAL 7035 Light Grey powder-coated 1 universal shelf with bracket, preassembled, supplied with mounting hardware

	Installation height	Order number
Universal shelf	1 U1)	PT.4111.091

Keyboard shelf

The keyboard shelf to accommodate keyboards up to 200 mm in depth has a low installation height of only 3 U1). Two adjustable bars prevent the keyboard from sliding about. This means the keyboard is therefore stowed safely in any situation. The pull-out length is 260 mm and permits ergonomic operation. The cables are routed securely and protected against damage when the keyboard is moved in an out.

Load capacity:	3 kg / 6,6 lbs
Finish:	RAL 7035 Light Grey
Scope of delivery:	1 keyboard drawer, preassembled,
	supplied with mounting hardware
Recommendation:	To obtain best functionality and a perfect, technical appearance, we recommend to order an additional shelf (see page 15) as covering for the keyboard shelf.

	Installation height	Order number
Keyboard shelf	3 U1)	PT.4108.091

Equipment fixing

Secures the equipment placed on the platform to prevent sliding. For mounting on the shelf or block of drawers.

The particularly flat fixing corners (height 3 mm) even fit under equipment with flat feet, e.g. printers. They are self-adhesive, but can also be screwed in place.

Finish:RAL 7035 Light GreyScope of delivery:4 fixing corners, supplied with mounting hardware

	Order number
Equipment fixing	FC 0221.1

The block of drawers in the **pro-cart** product line is fitted with a latch mechanism that can be operated by one hand. This ensures that the drawers cannot open inadvertently when the cart is pushed over a threshold.

The pro-cart block of drawers is supplied in the following versions:

- Block of drawers without handle on shelf
- ² Block of drawers, with handle on shelf

Block of drawers with mousepad (pull-out right / left), with and without handle on shelf

Block of drawers high, 1 unit, with and without handle on shelf

Interior area:	340 mm x 240 mm x 80 mm (W x D x H)
	340 mm x 240 mm x 175 mm (W x D x H), drawer high
Load capacity:	Shelf: 15 kg / 33 lbs distributed load
	Drawer: 3 kg / 6,6 lbs distributed load
Finish:	RAL 7035 Light Grey, decorative colour drawer handle/handle on shelf see 2)
Scope of delivery:	1 block of drawers preassembled, supplied with mounting hardware

Isolating transformer

Isolating transformer

Isolating transformers are used to reduce the maximum discharge current to values in conformity with rated current.

If several units are being used on one equipment cart, the individual devices are frequently supplied with electricity via one multiple socket strip mounted on the cart. The earth-leakage currents from this equipment can add up to a value that is significantly above the permissible limit of 0.5 mA. Since the earth-leakage currents can also occur during defective operation, the isolating transformer prevents these currents discharging to earth through the patients or the medical staff/ theatre personnel. This guarantees maximum safety for levels for all those people involved.

The isolating transformers for **pro-cart** can also be fitted with an ELG insulation monitor. This can be connected with simply Plug and Play technology. Only one slot on the EUR socket strip is required. This is a visual/ acoustic signal that alerts users to falling insulation resistance of the entire system, in the critical range, via an LED display. An acoustic alert is also given if there is a hazard. It is also possible to check the overall status of the system before every investigation or operation. However, this does not replace the test/ maintenance intervals laid down for individual units.

Isolating transformer for pro-cort

Power:	660 VA / 1200 VA
Input/output voltage:	115 V / 115 V or 230 V / 230 V, 50 Hz / 60 Hz - reversible
Power input:	IEC 320 EURO input for use of country-specific power cables

STATIONARY CARRIER SYSTEMS MOBILE EQUIPMENT CARTS

It's all there

This CD provides you with information on our stationary support systems and mobile equipment carts. The CD also presents our complete range of accessories. It gives you access to our helpful Configurator. This will help you put together your ITD support sytem and try out different configurations.

If you don't already have a copy of our CD, we will send you a CD on request:
